To Whom It May Concern

We appointed Adam Continuity in 2007 to provide assurance that our IT back-up procedures would be effective in the event of a disaster and ensure that professional help would be available very quickly to restore College systems.

Adam Continuity were very responsive and we were impressed by their attention to detail in both the planning and the rehearsal which went very smoothly.

We now have the confidence that should the College's IT systems fail there is a planned recovery process.

I would not hesitate to recommend Adam Continuity as part of an organisation's disaster recovery plan.

Yours sincerely

**JOHN HAWKSWELL**
