

# ENSURE YOUR IT IS READY FOR ANYTHING

Ensuring you have an airtight disaster recovery plan for your technology environment is key in protecting your critical assets and ultimately, productivity in the event of an emergency or data loss. But when your IT team is busy on the urgent matters of today, it can be difficult to think longer term and get such a plan in place - especially when having to imagine worst-case scenarios.

DRaaS offers industry-leading disaster recovery, leveraging the latest cloud technologies for the ultimate in scalability and flexibility. With transparent billing and no upfront licensing fees, DRaaS is an affordable end-to-end solution offering unbeatable protection for your critical data and fast and secure recovery in the event of an incident.

## FEATURES AND BENEFITS

### 4 STEPS TO SUCCESS

#### 1) Choose your systems

Choose the systems and services to cover in the event of a problem.

#### 2) Select SLA

Select the right Recovery Point Objective (RPO) for you. We offer recovery in as little as 15 minutes.

#### 3) Add services

Opt in or out of Centerprise management and support services to suit your needs.

#### 4) Roll-out

You're ready to roll-out your DRaaS solution and get the ultimate peace of mind in the event of a problem.

### WHY CI CLOUD?

#### Simple roll-out

Installed in minutes by deploying an agent on any physical or virtual server that should be covered by your DR process.

#### Flexible and scalable

DRaaS is application independent and uses Linux KVM natively to provide the ultimate in flexibility and scalability. It can also be customised to be used with other popular solutions such as VirtualBox, HyperV and VMWare.

#### Unbeatable reliability

Offers incremental sync or Recovery Point Objective (RPO) as low as 15 minutes and Recovery Time Objective (RTO) of less than 2 minutes to bring up a failed server, enabling you to get back up and running quickly in the event of a disaster or outage.

#### Seamless recovery

Utilises the latest in cloud technology with integrated methods to seamlessly sync back data changes to your primary environment after an actual disaster or outage.

### Premium Support

24x7x365 online support from certified and knowledgeable engineers, underpinned by guaranteed SLAs.

### High Performance

Built on agile and elastic architecture with reliability built in and utilising rapid, repeatable and bespoke provisioning to deliver industry-leading performance.

### Guaranteed UK Data Residency

CiCloud DRaaS offers the flexibility of both multi-tenanted public cloud and dedicated resources for virtual private cloud - all out of our secure UK data centre.

### Certified and Compliant

Accredited and secure hosting facility that's compliant with all major industry standards, including ISO 27001, PCI-DSS, Trusted Cloud and fully GDPR compliant.

### Green Credentials

Located in the Ark Data Centre, CiCloud is direct air-cooled and has a world-leading PUE of just over 1, making it up to 33% more energy efficient than the industry average.\*

### Cloud Without Limits

With no set sizing limitations unlike other cloud platforms, CiCloud DRaaS allows you to quickly provision the backup strategy that's right for your business plan.

**Self-service DRaaS:** The least expensive option is self-service DRaaS, where the customer is responsible for the planning, testing and management of disaster recovery, and the customer hosts its own infrastructure backup on virtual machines in CiCloud. Careful planning and testing are required to make sure that processing can fail over to the virtual servers instantly in the event of a disaster. This option is best for those who have experienced disaster recovery experts on staff.

Whichever of these models suits you, CiCloud DRaaS has a solution.
